### **To Whom It May Concern**

I am writing to provide my strong recommendation for Muhammad Ahmad, who recently completed an internship at Chaudhary Agriculture Research Farm under my supervision. During this period, Muhammad Ahmad worked on a review article titled “Integrating Engineering and Technology for Sustainable Food Systems” which has now been accepted for publication in the “International Journal of Recent Trends in Multidisciplinary Research.”

Muhammad Ahmad demonstrated exceptional research and writing abilities throughout their internship. They extensively reviewed the literature, synthesized current findings, and critically analyzed relevant data to provide insightful conclusions. Their ability to present complex topics clearly and engagingly reflects their deep understanding of the subject matter, particularly in the context of sustainable food systems and the integration of engineering and technology in this domain.

The review article authored by Muhammad Ahmad is a testament to their dedication and academic rigor. They demonstrated strong initiative, independent research skills, and a commitment to advancing knowledge in sustainable food systems engineering. I do not doubt that their publication will contribute valuable perspectives to the ongoing discussions in the field of food and agriculture science.

I wholeheartedly support Muhammad Ahmad's submission to the International Journal of Recent Trends in Multidisciplinary Research and highly recommend their work. Should you require any further information, please do not hesitate to contact me.

Sincerely,

Hafiz Usama

Senior Farm Manager

Chaudhary Agriculture Research Farm, Kasur
